

smarter cyber services

Emergence business cyber insurance policyholders have access to the below smarter cyber services at no extra cost.

1-HOUR RESILIENCE SESSION

Access to cyber experts who provide practical advice, guidance, and education to help organisations reduce cyber risks and respond more effectively to incidents if they occur. Policyholders can choose from:

CYBER RISK CONSULTATION

Tailored to the policyholder's organisation, this session helps identify key cyber risks and practical ways to manage them. It provides guidance on technical controls, governance considerations, and access to useful resources.

STAFF TRAINING SEMINAR

These interactive seminars help staff build practical cyber security habits that protect organisations. Sessions cover common attacks relevant to the organisations and the everyday behaviours that can help prevent them.

EXECUTIVE INCIDENT WALK THROUGH

Guiding executive teams through the typical stages of a cyber incident, these sessions highlight key decisions, responsibilities, and common pitfalls to help leaders respond with greater clarity and confidence during a high-pressure event.

Policyholders can book online:

SMARTER CYBER THREAT MONITORING

We continuously monitor policyholders' domains and internet-facing assets for emerging cyber threats and signs of exposure. If we identify a serious issue, we alert promptly with clear information, practical mitigation advice, and support if needed — enabling policyholders act early before issues escalate. This includes:

VULNERABILITY DETECTION

RANSOMWARE AND DATA BREACH NOTIFICATION

DARK WEB ACTIVITY REPORTS

CREDENTIAL THEFT REPORTING

SIGNS OF COMPROMISE ALERTING

Automatically provided for policyholders

RISK REDUCTION RESOURCES

Policyholders have access to a growing library of practical resources designed to help organisations reduce cyber risk and improve resilience. Developed in-house and shaped through consultation with organisational leaders, the library includes plans, templates, tools, and guides to support real-world risk management.
